

Canada's Energy Companies Need More Pipe

Description

Aside from being a hot-button environmental issue, **TransCanada's** ([TSX:TRP](#)) Keystone XL is having a major impact on the depressed price of Canadian crude oil. In this video, Fool.com contributor Aimee Duffy takes a look at a handful of pipeline projects that have yet to be realized that are having a devastating impact on Canadian energy stocks.

While oil and natural gas steal many of the energy related headlines we see, uranium has the potential to be *the* fuel that powers the 21st century. [Click here now](#) for instant access to our **FREE** report titled "**Fuel Your Portfolio With This Energetic Commodity**". We think you'll be surprised just how bright the future is for uranium, just how far these two Canadian names have fallen, **AND how fast** they could rebound.
