

Natural Gas: What Can't it Fuel?

Description

Whenever the words “natural gas transportation” are mentioned, cars and trucks are typically the first things that come to mind. A recent deal may begin to alter this line of thought.

This week, **Westport Innovations** (TSX:WPT) announced that it had signed a deal with **Canadian National Railway** (TSX:CNR) to build LNG-powered locomotives. As intriguing as this story may sound, it isn't the first time natural gas has been considered for railroads. Burlington Northern Santa Fe has been testing the idea for the past couple months as well.

In this video, Fool.com contributors Tyler Crowe and Aimee Duffy take a look at some of the advantages natural gas has in powering vehicles other than cars and trucks and why engine manufacturers should pay attention.

While oil and natural gas grab many of the energy related headlines we see, uranium has the potential to be *the* fuel that powers the 21st century. [Click here now](#) for instant access to our **FREE** report titled “**Fuel Your Portfolio With This Energetic Commodity**”. We think you'll be surprised just how bright the future is for uranium, just how far these two Canadian names have fallen, AND **how fast** they could rebound.
