

## Enerplus Having a Strong 2013

### Description

In the following video, Motley Fool energy analysts Joel South and Taylor Muckerman highlight **Enerplus** (TSX:ERF,NYSE:ERF), a Canadian oil and gas producer that has outperformed the TSX Composite index by 14% year to date. While the company did slightly exceed expectations on normalized earnings per share in the first quarter of this year, Joel gives investors the real story with this company; its strong assets in several oil-rich regions that have been powering its success. Joel tells us how the company is not only expanding in areas like the Marcellus and Bakken shales, but also increasing its well yields in these areas, which is driving home returns for investors.

While oil and natural gas grab many of the energy related headlines we see, uranium has the potential to be *the* fuel that powers the 21st century. [Click here now](#) for instant access to our **FREE** report titled "**Fuel Your Portfolio With This Energetic Commodity**". We think you'll be surprised just how bright the future is for uranium, just how far these two Canadian names have fallen, **AND how fast** they could rebound.
